Hello ATSDR,

I helped Dom a little with his Former Federal Mogul site. Contaminants of concern in gw are PCE and TCE. I am drafting letters to send to the two homes and one American Legion Post where we collected subslab soil gas.

See the results of soil gas for COAB6/SG-01 in the attached table.
.....and the photo of the basement where the sample was collected.

Ex. 5 Deliberative Process (DP)

Thanks...

Jack Kelly
